Education

2025 – 2026
Professional Diploma in UX Design
UCD Professional Academy / UX Design Institute

2023 – 2024
MSc in Software Design with Artificial Intelligence
Technological University of the Shannon, Athlone

2016 – 2019
Higher Diploma in Computer Science
Atlantic Technological University, Sligo

2013 – 2015
MA Historical Archives
Maynooth University

2007 – 2011
Doctor of Philosophy (Ph.D.)
Mary Immaculate College, Limerick

2003 – 2007
BA History and English
Mary Immaculate College, Limerick

Portfolio

Analog Devices – CodeFusion Studio User Guide
Developer-facing help content for embedded software tools.

View Documentation

Summary

Senior technical writer with 9 years of experience documenting developer tools, APIs, and SaaS platforms. Owns docs-as-code end to end: writing the content and maintaining the infrastructure behind it, including GitHub Actions workflows for linting, building, and deploying to GitHub Pages. Builds AI automation that keeps documentation in step with the product, including a GitHub Agentic Workflow that detects codebase changes and opens documentation PRs for review, Claude Code skills for style-guide checks, and publicly distributed Claude Code plugins. Strong technical background with an MSc in Software Design and Artificial Intelligence and hands-on experience testing pre-release builds with engineering teams. Currently pursuing a Professional Diploma in UX Design.

Work Experience

2024-09 – Present

Senior Technical Writer – Embedded Developer Tools

Analog Devices

- **Technical Documentation:** Owned developer-facing content for the open-source embedded tool CodeFusion Studio, including user guides, CLI workflows, API references, tutorials, release notes, and video content; authored 300+ pull requests.
- **Docs Infrastructure & CI:** Built and maintain GitHub Actions workflows that automatically lint, build, test, and deploy every documentation build to GitHub Pages; produced and deployed multiple versioned documentation releases.
- **Agentic Documentation Workflow:** Built a GitHub Agentic Workflow (gh-aw) that detects codebase changes and opens PRs updating the documentation, release notes, and changelog for writer review.
- **Claude Code Skills & Plugins:** Created repository Claude Code skills for style-guide checks, and publicly distributed Claude Code marketplace plugins that let users query the documentation and run complete end-to-end command-line workflows.
- **AI Discoverability:** Implemented answer engine optimisation (AEO) for the documentation, including llms.txt and llms-full.txt, so AI assistants can find and accurately cite product content.
- **Pre-release Testing & Research:** Independently researched technical concepts and product specifications; pulled and tested pre-release builds against documentation in virtual and local environments, ensuring accuracy and identifying issues before release.
- **QA Partnership:** Collaborated with the testing team each release to ensure documentation is accurate and ready to support their test plans.
- **Team Collaboration:** Worked daily with embedded software engineers and cross-functional product teams across Asia, Europe, and the US; gathered technical input directly from developers and authored documentation for a diverse global audience.
- **User Validation:** Conducted user validation with developers to ensure documentation supported real workflows and reduced onboarding friction.
- **Sales and UX Content:** Contributed to customer-facing content, including marketing copy, sales training content, and UX writing.
- **Content Planning:** Used Jira and Jama to plan, scope, and track content requirements for product features and releases.

Core Skills

- Cross-functional Collaboration (Product, Engineering, UX)
- AI Documentation Automation (GitHub Agentic Workflows, Claude Code skills & plugins, GitHub Copilot, llms.txt, AEO)
- Docs-as-Code & CI (Markdown, Git, GitHub Actions, GitHub Pages, Docusaurus, MkDocs, YAML)
- Developer & API Documentation (REST, Postman, Swagger, cURL)

- **AI-Assisted Reviews:** Use Claude Code and GitHub Copilot for content development, code review, and PR reviews, improving quality and reducing turnaround time.

2022-02 – 2024-08

Technical Writer & Product Owner – SaaS / API Integrations

Oomnitza

- **Documentation:** Built out the complete product documentation suite from scratch, ensuring comprehensive coverage of all features. Created and managed HTML content using MadCap Flare, and managed open-source documentation on GitHub using Markdown in a docs-as-code workflow.
- **APIs:** Tested and documented APIs using tools such as Postman, Swagger, and cURL.
- **Style Guide Implementation:** Established and enforced documentation style guide standards.
- **Product Design:** Gathered requirements, designed features in Figma, and created supporting documentation for development and stakeholders.
- **Product Release Leadership:** Led a major product release by coordinating with cross-functional teams, including Senior Product Management, Support, Customer Success, and Engineering.
- **Backlog & Sprint Management:** Managed the product backlog in Jira, facilitated sprint planning sessions, and prioritized user requirements to ensure timely delivery of features.
- **UI/UX Input:** Provided labeling and design suggestions for new features to enhance user experience and interface design.
- **Troubleshooting:** Reproduced software bugs in both Linux and Windows environments and documented workarounds.
- **Portal Maintenance:** Maintained and updated the publishing portal aesthetics using HTML, CSS, JavaScript, and Python.
- **Support:** Managed internal support and customer documentation requests through Zendesk.

2020-03 – 2022-01

Cloud Consultant – EDI Integration

OpenText

- **XML and EDI Development:** Utilised mapping tools and developed C# applications to configure XML documents in compliance with EDI standards.
- **Documentation Management:** Created and maintained implementation instructions, help guides, project design documents, and technical specifications.
- **Customer Support:** Provided ongoing technical support to customers via ServiceNow.
- **Web Development:** Developed and customised customer SupplierWeb portals using HTML, CSS, JavaScript, and SQL.
- **Protocol Configuration:** Configured communication protocols such as OFTP, SFTP, AS2, and HTTP for secure data transmission.
- **Version Control & Project Management:** Managed version control using Git and SVN, and coordinated project activities using Atlassian tools, including Jira (Agile methodologies) and Confluence for documentation.

- QA & Pre-release Testing (AWS EC2, Docker, Jenkins, VMs, Linux, Windows)
- Content Strategy & Auditing
- UX Writing & Content Design (Figma)
- Project Management (Jira, Confluence, Zendesk)
- DITA/XML & Structured Authoring (Oxygen, FrameMaker, MadCap Flare)
- Programming (Python, C#, JavaScript, SQL, HTML/CSS)

2017-08 – 2020-02

Technical Writer – Configuration Tools for Embedded Devices

Johnson Controls

- **Metasys® Tools Lead Writer:** Led content creation for Metasys® Tools, progressing from Graduate Technical Writer to Technical Writer III.
- **Content Migration & Process Improvement:** Part of the DITA team responsible for migrating Tech Comms content to DITA/XML across the organisation, improving consistency and streamlining the publishing workflow.
- **Documentation Tools:** Created and managed DITA/XML content using Oxygen, XMetaL, FrameMaker, and Documentum, with version control through SVN and later Ixiasoft CMS.
- **Publishing Portal Maintenance:** Worked with the Web Team to maintain the Fluidtopics publishing portal, assisting in testing, maintenance, and updates using CSS, JavaScript, Python, and SQL.
- **QA Testing:** QA tested software builds and the content that surrounds it.
- **DITA/XML Training:** Delivered training on DITA/XML publishing; tested and troubleshot build and output errors.
- **Peer Support:** Provided peer reviews and support on technical writing tools such as Oxygen, Ixiasoft, Fluidtopics, and SVN.
- **Jira Management:** Developed and managed Jira user stories, ensuring all Definition of Done and Acceptance Criteria were met within sprint cycles.
- **Team Coordination:** Worked closely with international engineering and design teams in an Agile (Scrum and Kanban) environment.
